DEV VERSUS OPS

WHAT WE HEAR FROM DEV

“We do not launch big changes, this is just a flag flip”

“This is a hotfix!”

“This is just a UI change... No big thing”

“Only a 20% experiment.”

WHAT WE HEAR FROM OPS

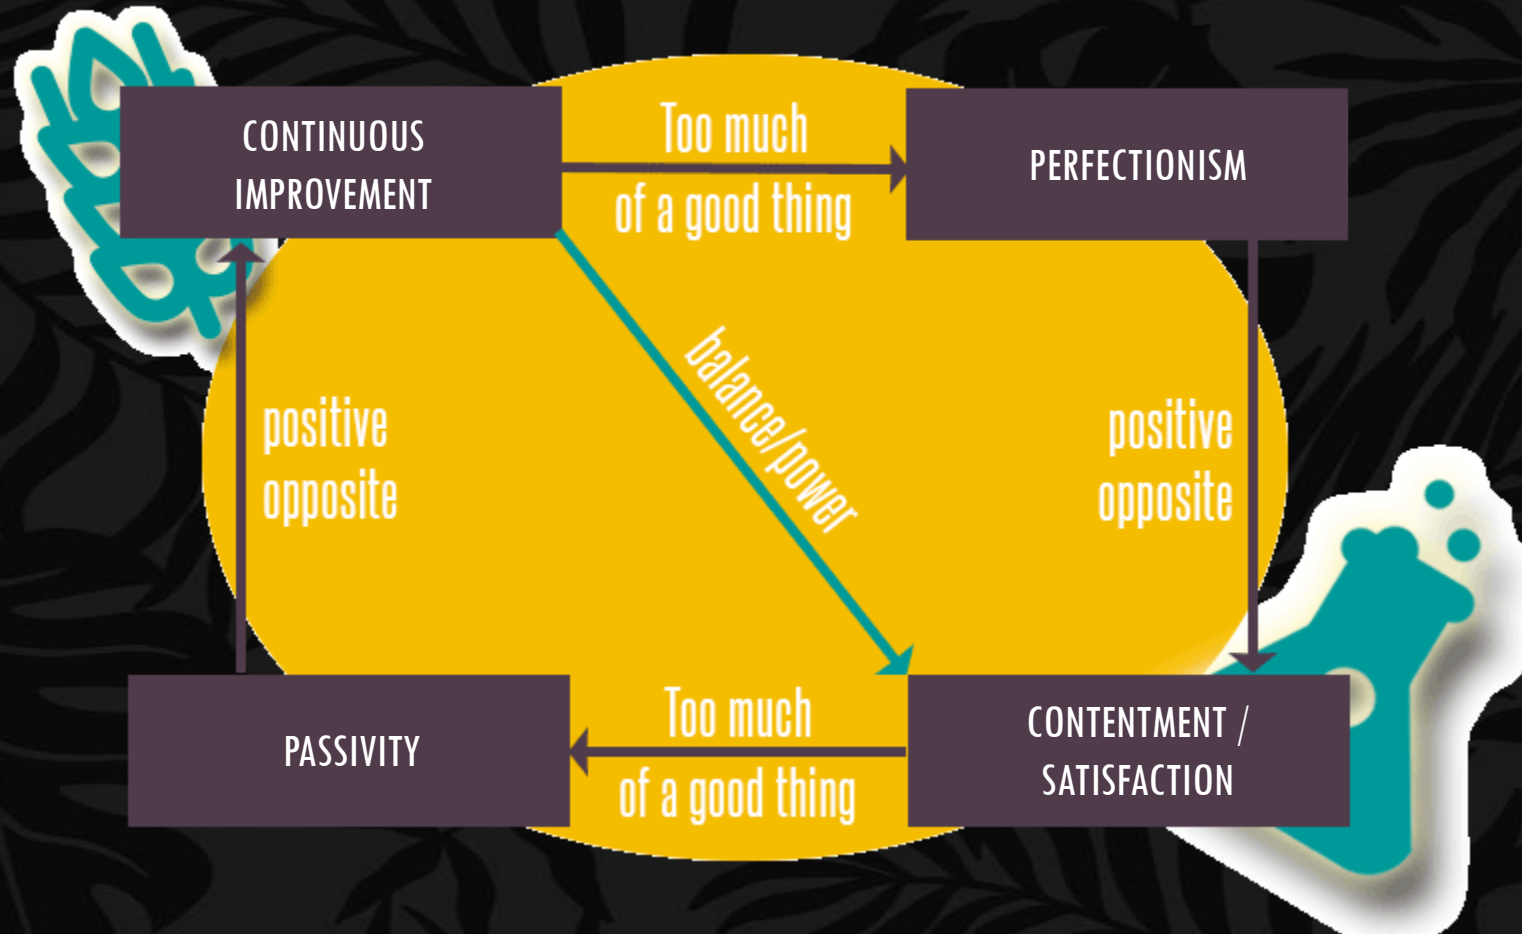

“We need to have a launch review!”

“Please let the CAB approve first”

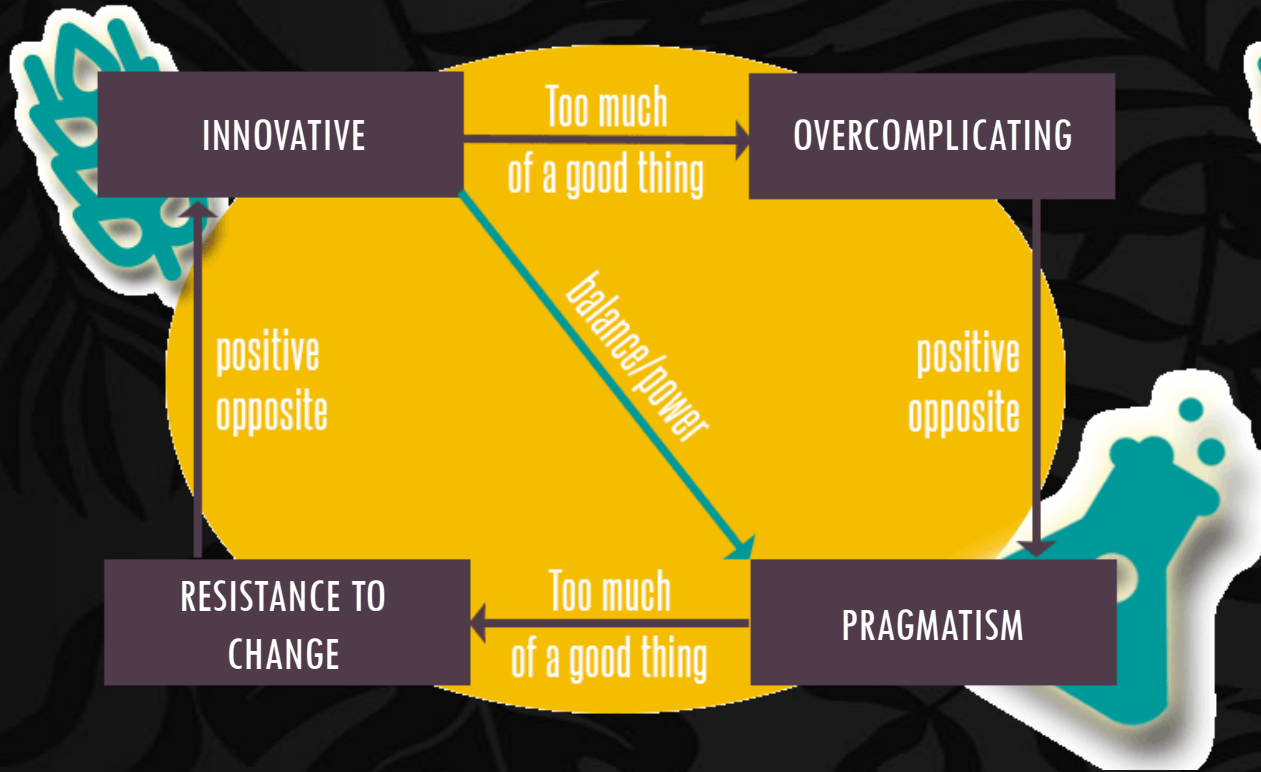

“This is our change management checklist”

“We should validate first in Test and Pre-Prod”

CHANGE MANAGEMENT

A close-up photograph of a woman's face, framed by a magnifying glass. The woman has dark hair and is looking directly at the camera with a neutral expression. The background is blurred, showing what appears to be a patterned fabric. The text "HOW ABOUT YOU?" is overlaid at the bottom in a bold, white, sans-serif font.

HOW ABOUT YOU?

Apple: Our products are beautifully designed and easy to use

What = The Result

What do you do? The result of Why. Proof.

Apple: We make computers

5 TIMES WHY

- Why do you need to implement DevOps?
 - We need to be cheaper

CULTURE OF FEAR

Uh... yeah. So I guess we should probably go ahead and have a little talk. Hmm?

A brown horse is lying on its side on a light-colored wooden floor. The horse is wearing a dark, possibly black, protective blanket or saddle pad. The setting appears to be an indoor space, possibly a museum or gallery, with white walls and a dark ceiling. In the background, there are some blurred figures of people and what looks like a display case or wall panel. The overall lighting is somewhat dim, with a focus on the horse.
